- Artwork must be dry, framed, and wired for hanging. No metal or plastic sawtooth hangers. The hanging system cannot accommodate them.
- Prepare your artwork for exhibit:
  - Clean glass or plexiglass on both sides.
  - Tape artwork to the mat. This is not necessary if the outside measurement of the work and the mat are the same.
  - Attach wire on both sides of the frame one-third of the way down from the top of the frame. The wire should not be taut, but there should be very little slack. If you have questions about how to properly wire your work, please contact me at the number given below.
- Photographs that are printed on paper must be matted and framed with glass or plexiglass. Photographs that are printed on other surfaces, such as wrapped canvas, need not be matted or framed, but they must be wired for hanging, in the manner described above.
- No matted-only artwork or photographs.

### **Sale of artwork**
